GERBER SCIENTIFIC PRODUCTS

OMEGA™ Graphics Design & Production Software

Building a complete print-to-cut or cut vinyl solution begins with the right software. GERBER OMEGA design and output software is a complete suite of layout, design, output and conversion tools created specifically for use in the sign industry. OMEGA capabilities allow you to create sophisticated, technical or advanced layouts while maintaining a simple and consistent operation. OMEGA design and output tools are fine-tuned to accommodate vinyl cutting, printing, and routing on sign-industry production devices such as Gerber vinyl cutters, the GERBER EDGE® family of thermal transfer printers, and GERBER SABRE™ series and Dimension 200® routers. OMEGA is intuitive, versatile, and easy to use—a software powerhouse that has the capability to enable a beginner and propel the expert.

OMEGA™ 2.5 New Features

Our gallery of new tools puts advanced capabilities right at your fingertips. You save time and effort with our new Clipping Paths, Embedded Images, Dimensioning Tools, Improved File Importing and Layers Tools for design and output. Add these to existing OMEGA features—Vector Design Tools, Detail Node Editing, complete Text Creation and Control, Color Assignment and Matching—to achieve those special effects you always dreamed of!

ADDITIONAL OMEGA 2.5 FEATURES

- Improved designing and displaying of vinyl-only jobs.
- More than 100 additional standard Gerber Soft Fonts.
- Multimedia tutorials provide overviews of new OMEGA 2.5 features and functions.
- Ability to pause GERBER EDGE series printers before rewinding the vinyl between colors.
- Spoolview preflight tool allows viewing of the color separations in spool files.
- Gerber vinyl and foil palettes now list both the vinyl color name and family.
- ARTPath™ router toolpath generation program now standard.
- ColorID™ allows input of CMYK and RGB colors that can be matched by colors in target palettes.

MacImprint™ 2.2 Software

The GERBER EDGE® is the world's best production tool to create durable spot color and process color graphics on a variety of durable and specialty substrates. Now you can drive the GERBER EDGE and Gerber vinyl cutters directly from Adobe Illustrator® 10 running on the Mac OS X. Version 2.2 includes plug-ins for the EDGE® which add advanced EDGE printing capabilities, spot color swatches and contour cutting.

ART Path™ Routing & Engraving Software

ART Path is our unique open architecture software program that makes it possible for shops that have never used an automated router before to start doing so easily, quickly, and proficiently. ART Path takes Gerber software jobs you might otherwise cut from vinyl or from standard file formats (.AI, .EPS, .DXF, .HPGL) and allows you to add all sorts of creative dimensional treatments, right on the screen.

ART Path Features

- Automatically generate tool paths from any PC-driven router from Gerber
- Template function that enables you to specify the tool, the total depth, the depth of pass, and the router bit feed and plunge rates automatically for whatever material type and size you're about to use
- Freely move and rotate any component part of your layout to get maximum output from your material
- ART Path is included with the purchase of any Gerber Router

ART PATH™ SOFTWARE

ART Path™ Software is available by special order. Call 841-7683 for more info.

Auto-Carve™ 3D Software

A complete carving package, only from Gerber. Even if you've never carved before, Auto-Carve™ 3D is your ticket into lucrative new markets you may have thought were out of reach such as traditional carved signs, point-of-purchase displays, engraving applications, prototypes, personalized products, vacuum forming molds, die making, boat signs and more. And, with Gerber's patented prismatic lettering process, you'll be an instant master of this highly sought-after classic style.

Three Types of Carving Styles:

- Incised Carving-for V-Bevel Shapes and Letters
- Chamfered Carving-for Flat-Bottomed Shapes and Letters
- Prismatic Carving-for Raised Shapes and Letters
