- *Certified Green® Energy efficient.
-high density, thermal insulation*
- *Variable air speed control*
- *Forced air in each drawer*
- *Separate timer for drawer*

2-Drawer Verticure

deeper drawer design ideal for shoes

1-Drawer Verticure

Since 1963, HIX has been the leader in curing water based screen printing inks on garments with our electric dryers. Our expertise with this process has put HIX years ahead of the competition, and made us the only real choice in drying systems when it comes to effectively curing water based inks. HIX electric dryers combine the right mix of infrared energy and forced hot convection air to quickly evaporate and cure water and solvent from plastisol and ink jet inks.
